Advanced Stretch Film Solutions
for Secure and Efficient Packaging

Advanced Stretch Film Solutions

for Secure & Efficient Packaging

Capable of producing high-performance cast stretch films designed to meet the demanding needs of logistics, warehousing, and manufacturing industries; Our films combine clarity, strength, and elasticity to ensuring optimal load stability and product protection in every wrap.

With full in-house production capabilities, we offer a wide range of stretch film specifications and performance grades, including anti-static and anti-UV options. Whether you're bundling lightweight items or wrapping heavy pallets, our stretch films adapt to your process and improve packaging efficiency while minimizing waste.

PRODUCT SPECIFICATIONS

- **Material:** Polyethylene (PE)
- **Manufacturing Type:** Cast film (for superior optical clarity and consistency)
- **Thickness Range:** 10 to 30 microns (customizable based on use case)
- **Layer Options:** 2-layer / 3-layer / 5-layer
- **Core Diameter:** 3 inches (standard)
- **Cling Options:** Single-side or double-side cling
- **Stretch Ratio:** Up to 300%
- **Additives Available:**
 - Anti-UV for outdoor storage and sun exposure
 - Anti-Static for electronics and dust-sensitive packaging
- **Color Options:**
 - Transparent (standard high clarity)
 - Colored (in 10 colors and customized)

APPLICATIONS

Our stretch films are ideal for:

- Securing palletized goods for export or local transport
- Protecting items against dust, moisture, and shifting
- Wrapping irregular-shaped loads without damaging packaging
- Use in automatic, semi-automatic, and manual wrap systems

EXPORT & PRODUCTION CAPACITY

- Fully manufactured in-house
- Export-ready with competitive lead times and packaging flexibility
- Capable of producing large-scale orders for domestic and international clients

COMPETITIVE ADVANTAGE

Ability to adapt to our customers' specific needs and requirements at a highly competitive price
